

NOBLÈS PELLETT STOVE

The Altech Noblès is one of the smallest soapstone pellet stoves in the Altech family, but this does not detract from its performance. Despite its compact size, this pellet stove has all the properties you can expect from a real soapstone stove. The Noblès pellet stove is highly suitable for insulated, modern houses. Thanks in part to the 5.5-cm soapstone exterior, you can enjoy delightful heat for hours after the fire has been extinguished. This means you can burn your pellets economically and responsibly!

PRODUCT BESCHRIJVING

The Altech pellet stoves, including the Noblès, are equipped with a patented micro-gasification system that ensures clean combustion and very high yields. The Altech pellet stoves (like wood-burning stoves) use oxygen from the space they are in and the natural airflow of the flue. This power-free combustion system means no fans are required. As a result, you won't have to deal with noise or malfunctions.

ENJOY THE FLAMES TO THE FULLEST

In addition to the delightful, intense heat produced by the Altech Noblès pellet stove, this stove also allows you to enjoy the wonderful flames to the fullest. The Noblès pellet stove features a large window, which offers a great view of the fire.

MULTIPLE COLOURS AND OPTIONS AVAILABLE

The Altech Noblès pellet stove is available in two colours: natural soapstone with anthracite cast iron and uniform black. Both the soapstone and the cast iron of the uniform black version are spray painted black. By default, the Noblès is a front pellet stove featuring a 2.5-kilogram pellet burner.

Curious about the Altech Noblès soapstone pellet stove?

Experience the delightful heat and take a look at this stove in the showroom of one of our dealers.
